Asignatura 15446 FONETICA INGLESA

Grupo 1

Presentación

COURSE SPECIFICATION: 1 four-month period. ECTS Credits:4.
The Study of Phonetics:Pronunciation and Phonemic Transcription.

TYPE OF COURSE: The three weekly hours assigned to the subject will be divided into theoretical and practical sessions.

Programa Básico

Esta asignatura tiene como objetivo la adquisición del vocabulario técnico preciso que permita a los alumnos describir con exactitud el modo articulación y la producción de los fonemas de la lengua inglesa, descubrir las leyes que llevan de la ortografía a la pronunciación y alcanzar un nivel óptimo en la pronunciación y capacidad de discriminación de sonidos en lengua inglesa.

Objetivos

COURSE DESCRIPTION: AIM OF THE COURSE: This course aims at providing a theoretical framework that will give the students an understanding of segmental and suprasegmental English Phonetics. At the same time, the course gives practice in listening, discrimination and production of isolated words and connected speech, as well as of the rhythmic characteristics of English in order for the students to acquire a good pronunciation of English, and to be able to understand spoken English used in different situations. In the third place, it is our goal to help the students become technicians in the subject of pronunciation, that they may diagnose errors, make accurate statements about them, and give articulatory instructions as to how correct them.
