

Adenda Guía docente de la asignatura (2º Cuatrimestre 2019-2020)			
Asignatura	Geobotany		
Materia	Natural Sciences		
Módulo	Optional Module/ International Semester on Forestry		
Titulación	Bachelor degree in Forest and Natural Environment Engineering		
Plan	449	Código	42163
Periodo de impartición	Second Semester	Tipo/Carácter	Optional
Nivel/Ciclo	Bachelor	Curso	4º
Créditos ECTS	3		
Lengua en que se imparte	English		
Profesor/es responsable/s	Pilar Zaldívar García, MSc, PhD		
Datos de contacto (E-mail, teléfono...)	pilar.zaldivar@uva.es , 979 10 84 39 (office) Main building (Green building) Office HF234		
Departamento	Agroforestry Sciences – Ciencias Agroforestales		

5. Teaching methods from March 13, 2020

Through de Moodle learning platform, provided by the University of Valladolid, the students can gain access to course materials.

For every topic, two assignments will need to be completed online. All come with deadlines and students will need to make sure to complete the forms before the deadline if they want to get credit on a continuous grading system.

One of the assignments is a analysis and evaluation of the topic, pointing out the difficulties found. In the second assignment, the students are expected to complete a quizz, according to the course schedule.

All doubts are answered by the professor and there is also a forum permanently open to ask any question.

6. Student dedication to the Course from March 13, 2020

On line Class	Hours	Outside Class	Hours
Lectures	20	Study and personal work	24
Total online class	20	Total outside class	30
