5. Métodos docentes y principios metodológicos desde el 13.03.2020

The course will be structured in such a way that students are able to participate actively in all lessons. In order for students to prepare these theoretical lessons beforehand, they will be required to make a series of readings, including a selection of articles or book chapters that will be provided to them before each session. These materials (as well as videos, documents or any other resource) will be uploaded to the virtual learning environment offered by the University of Valladolid.

Additionally, students will be required to deal with research tasks, and a series of virtual assignments will be required as part of the course. The Moodle-based virtual learning environment will be used to send and grade said assignments. Students are expected to approach this course with an open mind and a willingness to participate and engage with each other using the forums embedded in the virtual environment.
