## Contents

### **Part I. Current overview of the media land**

The media sector has undergone such a rapid evolution that the traditional boundaries of the media no longer make sense. Now companies and users are media, which means that they are both generators, publishers and disseminators of their own content and messages for their audiences of interest.

Technological progress has made this change in the landscape of the information, emerging new forms of communication focused on the online world and which are already, today, in common use throughout society.

Lectures:

1. Current situation of media corporations and their audiences
2. Reality of the press
3. Reality of television
4. Radio reality
5. Internet reality
6. The potential market niches: analysis of trends in the sector of information in Spain

### **Part II. Project preparation**

Every project that wants to be executed must have a process of research and maturation to choose the time of departure, legal form, economic plan, marketing plan and the best possible tools. The student should be able to identify the different processes that are needed within the course of the idea, its production and sells (marketing). In other words, everything that involves a flow of knowledge and that leads to the development of a complete action plan to launch your project.

Lectures:

7. Analysis of the General Environment (PEST)
8. Legal obligations and implementation
9. Market analysis
10. Economic plan
11. Communication and marketing plan
12. Digital Marketing Plan

### **Part III. Project launch and follow-up**

**Universidad de Valladolid**

Once the work indicated in the previous parts has been done, the student is ready to launch the project. To do this, they must create an initial content to launch their work. The student will be in the final stage to see his project become a reality. The goal is to realize that a good idea alone is not enough, but that there must be a comprehensive process of analysis that allows you to know the entire picture.

Lectures:

13. Tools for the development of the first content

14. Launch and post-launch follow-up

**Methodology**

The course Management and Production of Journalistic Projects includes sessions, practical sessions, examples of media-related business projects and sessions for the presentation of work or exercises proposed to students.

During the master sessions, the students will take advantage of the opportunity to transmit basic knowledge of the business environment by emphasizing what steps need to be taken so that they can develop their own professional activity. In some cases, if it is possible, there will be with the testimony of professionals who have launched their own in a satisfactory manner.

In the practical sessions, the content of the programme will be developed with the participation of students through assignments that will be given or worked in class.

In addition, a final work related to the contents of the discipline will be carried out that will be showed in the classroom.

**Evaluation**

Theoretical exam 30%  
Practical Skills 70%.  
-Final project 70%

The minimum grade to be obtained in each of the tests to pass the course is a 5 out of 10.

Plagiarism will be reason of failure.

**Bibliography**

The teacher will provide the appropriate literature and readings for each lesson at the beginning of the course.
